

Understanding Attention Deficit Hyperactivity Disorder (ADHD) in the classroom

This course looks at the impact ADHD can have on a student's life and shows how you can make your classroom and practice more inclusive for students with ADHD.

Learning outcomes

- Explore the possible causes of ADHD and learn about its distinguishing characteristics, prevalence, and behaviours commonly associated with the disorder.
- Learn how to assess individual needs arising from ADHD, identify and assess environmental triggers and create SMART goals for individual students.
- Explore different types of intervention to meet the needs of students with ADHD, including managing difficult behaviour, transitions, and social skills.
- Review real case studies that demonstrate the management of ADHD in the classroom from both perspectives i.e. the student's and the teacher's.

Duration

Approximately 10 weeks.

Delivery

Blended learning i.e. online course content and 3 virtual sessions via WebEx

Registration

yarrame.vic.edu.au

Cost

\$33 (including GST) registration fee. Whole schools are charged a one-day CRT rate
