

Understanding Attention Deficit Hyperactivity Disorder (ADHD)

This course looks at the impact ADHD can have on a student's life and shows how you can make your classroom and practice more inclusive for students with ADHD.

Learning outcomes

- Explore the possible causes of ADHD and learn about its distinguishing characteristics, prevalence, and behaviours commonly associated with the disorder.
- Learn how to assess individual needs arising from ADHD, identify and assess environmental triggers and create SMART goals for individual students.
- Explore different types of intervention to meet the needs of students with ADHD, including managing difficult behaviour, transitions, and social skills.
- Review real case studies that demonstrate the management of ADHD in the classroom from both perspectives i.e. the student's and the teacher's.

Duration

Approx 6 – 8 weeks

Delivery

Blended learning i.e. online course content (4 modules) and up to 3 virtual face to face sessions via WebEx

Registration

yarrame.vic.edu.au

Cost

\$85 (including GST) registration fee.
A discount applies for 6 or more registrations.
